

## Stencils, Masks & Patterns Selection Guide

### Materials and Applications:

**Sandblast Resist Mask** is 15 mil self-adhesive heavy vinyl for accurate template sandblasting of concrete or stone surfaces.

**Micro-Topping Vinyl Mask** is 8 mil self-adhesive medium vinyl, used to form channels for application of Spraycrete, GraniTite & other decorative concrete coatings to form precise labyrinth patterns on concrete. No cutting or grooving of the concrete is needed.

**Vinyl Floor Decal** is 2.75 mil self-adhesive vinyl. It is available in 60 colors, and may be used for temporary or permanent floor installations. Sealant or clear laminate is recommended for permanent installations (not included).

**Mylar Tracing Stencils** are used to outline a labyrinth design onto a surface for hand painting or staining. Precise edges for professional results.

**Kraft Tracing Stencils** are used just like our Mylar tracing stencils. Cut out the printed brown paper patterns prior to use.

**Kraft Paper Full Size Print Patterns** are used as full coverage stencils. Once secured in place, cut using a razor knife or paper slicer. Adhere to smooth surfaces using contact cement. We will print tape guidelines upon request if you prefer to use masking tape to adhere the pattern to your surface. Patterns are used as spray coating channels, or for application of paints or stains.

Net Labyrinth Diameter	Pre-Cut Self-Adhesive Panel Sets			Tracing Stencil Sets		Full Coverage Print Patterns

### General Notes for Stencils, Masks and Patterns:

Prices include free FedEx Ground or Priority Mail shipping in the lower 48 states.

Pre-Cut Panels ship in 25" long boxes, Mylar in 50" long boxes, and Kraft products ship in 74" long boxes.

Step-by-step instructions with panel layout diagrams are included.

All items are made to order, so Custom Sizes are no problem!

Select any one of our 46 designs - use our Portable Labyrinth information as a sizing guide.

Full-sized Chartres Replica™ designs are 42.28' diameter - order 44' product size.
